

### Data

Model	DTJ-V	JTJ-A	JTJ-H
Capsule Size	#00-#5	#00-#5	#00-#5
Capacity	12,000 capsules/hour	12,000 capsules/hour	20,000-25,000 capsules/hour,(With 2 pcs of capsule plate)
Power supply	380V 50Hz 2.2Kw	380V 50Hz 2.2Kw	220V 50Hz 2.2Kw
Weight	330Kg	330Kg	600Kg
Size	1200*700*1600mm	1200*700*1600mm	1020*870*1980mm

ProCap-2 Double Head Semi-Automatic Capsule Filling Machine

### Introduction

The machine is our newly upgraded generation special for Pharmaceutical products industry. Can fill material in powder, pellet, or granule forms.

Semi-Automatic Capsule Filling Machine

### Introduction

Semi-Automatic Capsule Filling Machine is special capsule filling machine which is suitable for medium and small pharmaceutical factory, hospital preparation lab, etc.

The machine adopted programmable control system, touch panel operation, stepless transduction speed-shift, and electronic automatic counter.

And it automatically completes the action of position, separation, filling, locking, etc. The dosage is accurate, and the operation is convenient.

Special Designed Double Head capsule sowing device adopts automatic servo motor system which make capsule auto separation after sowing. Triple the production capacity to 36,000capsules/hour

This model machine through CE certification, and meet the EU GMP standard.

### Data

Model	ProCap-2
Capsule Size	#000-#5
Capacity	36,000capsules/hour
Power supply	380V 50Hz 3.2Kw
Vacuum Pump	XD-040(60m <sup>3</sup> /hour)
Capacity Of air compressor	0.1m <sup>3</sup> /min
Noise	Less than 60dB(A)
Overall Dimensions	1600*800*1600mm
Weight	625kg

### Data

Model	NJP-400	NJP-800	NJP-1200	NJP-1500
Capacity	400/min	800/min	1200/min	1500/min
Capsule size	#00 - #5			
Noise standard	<75dB(A)			
Weight	900kg	1000kg	1050kg	1300kg
Size	660*800*1750mm	700*900*1850mm	1020*870*1980mm	1500*1040*1970mm

LiqPro-300 Automatic Hard-capsule Liquid Filling Machine

### Introduction

LiqPro-300 automatic hard-capsule liquid filling machine and sealing linkage line equipment can complete the filling of hard capsules (solution, suspension, microemulsion or hot solution) and sealing the capsule cap joint to make the capsule. The contents are sealed

NJP-series Automatic Capsule Filling Machine

### Introduction

Automatic capsule filling machine adopt PLC control system, human-machine interface, when running malfunction or lack of stuff, automatic alarm, malfunction display, automatic dismiss alarm. And with functions of password setup, touching screen display, automatic parameter setup, data printing, reset, etc.

It is an ideal equipment for filling capsule drugs and meets GMP standard.

in the process of packaging, transportation and use, which improves the stability and safety of the product.

It can provide new modes of administration, improve the drug delivery problems of many drugs, and fill the domestic and foreign pharmaceutical and health care.

### Data

Model	LiqPro-300
Yield	18,000 capsules/hour
Sealable capsule filling	Solution,suspension,microemulsion
Mold hole number	6 holes
Applicable capsule	00-4# gelatin, plant capsule
Environmental requirements	Room temperature around 20C, humidity 40% -55%
Voltage	Three-phase 380V/220V 50Hz
Total power	9KW
Compressed air	0.6Mpa
Total weight	2300KG
Dimensions	3800*900*1900mm
